Amendments to the Specification

Please amend Paragraph [71] as follows:

The second method is to connect an agent 710 having a web server function mounted thereon to the Internet so that the subscriber of the mobile terminal 30 connects to the Internet as shown as paths ① and ②. The subscriber connects to the agent 710 through an Internet host 720. Also, the mobile terminal 30, like the Internet host, ~~directly~~ connects to the agent 710 through the path 'b', and requests the inquiry and/or update of the packet terminating call filtering information to the agent 710.
